

## **ASX ANNOUNCEMENT AND MEDIA RELEASE**

**3rd September 2003**

### **JINGEMIA 2 UPDATE ONSHORE PERTH BASIN, WESTERN AUSTRALIA**

Norwest Energy NL advises that the Jingemia 2 appraisal well which is being drilled onshore about 300 kilometres north of Perth, at 6 am Western Standard Time today, was at a depth of 2,230 metres.

6am Depth: 2,230 metres  
Depth at time of last release: 2,006 metres  
Progress: 224 metres  
Current Operation: drilling ahead  
Proposed next 24 hours: drill ahead  
Well commenced drilling: 24th August 2003  
Objective Dongara Sandstone  
Objective Drilled Depth about 2,663 meters  
Objective Vertical Depth about 2,414 metres  
Proposed Total Depth: 2,725 metres

The Jingemia 2 appraisal well is being drilled from the Jingemia 1 production facility at high angle to target the Dongara Sandstone oil reservoir approximately 1 kilometre southeast of the number discovery well. As mapped, the well is designed to intersect the edge of the Jingemia Oil Field. Jingemia 2 will better define this field oil and determine the oil-water contact for the field. Drilling of this appraisal well will, therefore give greater confidence to field reserves and provide a point for water injection into the reservoir to provide pressure support.

Norwest Energy NL as a 1.278% interest in this well and the Jingemia Oil Field.

Norwest Energy NL will provide daily reports during drilling activities.

For and on behalf of  
Norwest Energy NL
